PROFESSIONAL SUMMARY

Full-stack developer (React, Node.js, C++) pursuing B.Tech in ECE at IIIT Ranchi, with 3 months of remote web development internship experience and two full-stack projects deployed online. Solved 250+ DSA problems, understand system design basics, and use AI tools (Antigravity, ChatGPT, Claude, Gemini) to speed up development and debugging.

EDUCATION

Indian Institute of Information Technology (IIIT) Ranchi

2023 - 2027

B.Tech in Electronics and Communication Engineering

CGPA: 7.39/10 (till 6th sem)

EXPERIENCE

Web Development Intern (Remote) | Briscent Global LLC (BISANA Connective Solutions)

Mar 2026 - Jun 2026

- Launched 5+ responsive web interfaces using HTML, CSS, JavaScript and React for live client projects, building reusable components for maintainable UI
- Collaborated with a distributed remote team using Git and GitHub for version control and code management across client projects
- Worked directly with clients to gather requirements and deliver features as per their needs
- Wrote 10+ pages of project notes and documentation to support development and team handover
- Tested APIs and debugged issues to improve application functionality and performance

PROJECTS

CollabDesk - AI-Powered Team Workspace

[Live](#) | [Frontend](#) | [Backend](#)

Tech: React, Node.js, Express, MongoDB, Socket.io, AWS (EC2, S3), PM2

- Built a full-stack workspace app with real-time Kanban boards using React, Node.js, Express, MongoDB and Socket.io
- Implemented JWT and Google OAuth 2.0 authentication, AWS S3 file uploads and Razorpay payments with signature verification
- Integrated Gemini API to auto-generate subtasks from task descriptions; deployed backend on AWS EC2 using PM2

Email Job Scheduler

[Live](#) | [GitHub](#)

Tech: TypeScript, Express, BullMQ, Redis, PostgreSQL, Prisma, React, Docker, Vercel, Render

- Built an email scheduling system with BullMQ delayed jobs that handles up to 10,000 recipients per request without blocking the API
- Designed per-sender rate limiting with an atomic Redis Lua script, plus idempotent workers and crash recovery
- Developed a React dashboard with Google OAuth login; containerized with Docker Compose and deployed on Vercel and Render

TECHNICAL SKILLS

Languages C++, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend React.js, React Router, Tailwind CSS, Vite, Axios

Backend & Auth Node.js, Express.js, REST APIs, Socket.io, BullMQ, Passport.js, Zod, JWT, Google OAuth 2.0

Databases PostgreSQL, MongoDB, Redis, Prisma ORM, Mongoose

Cloud & DevOps AWS (EC2, S3), Docker, Docker Compose, PM2, Vercel, Render

Tools & Testing Git, GitHub, Postman, Vitest, Supertest, ESLint, VS Code

Integrations Google Gemini API, Razorpay, Nodemailer

AI Tools Antigravity, ChatGPT, Claude, Gemini

CS Fundamentals DSA, OOPs, DBMS, Operating Systems, Computer Networks, System Design (Basics)

ACHIEVEMENTS

- Secured **95 percentile** in **JEE Main 2023**
- Solved **250+ DSA problems** in C++ across LeetCode (197) and local practice
- Earned LeetCode **50 Days Badge 2025** for consistent problem solving

POSITIONS OF RESPONSIBILITY

- Faculty Coordinator, FDP | IIIT Ranchi:** Coordinated a 4-day Faculty Development Program for 50+ participants, managing faculty communication, logistics and mess arrangements
- Organizer, Intra-Hostel Volleyball Tournaments | IIIT Ranchi:** Organized 3 tournaments with 5 teams each, handling fixtures, scheduling and team coordination
